

Prime Enginerring, PC

CIVIL ENGINEER AND PROJECT ENGINEER POSITION

(5-10 Years Experience)

Prime Engineering, PC is seeking highly motivated engineers and project engineers to join our growing company. Qualified candidates should have background in land development and site civil designs. Ideal candidate will be seeking career growth and increased responsibility with our dynamically growing Firm.

Responsibilities will include, but not be limited to:

- Manage, assist and support a team of design engineers to ensure projects are completed on time, according to project specifications and within budget.
- Utilize technical skills in storm water management, hydraulics, hydrological analysis, grading and other site development related skills to assist with the preparation of subdivision and land development designs; including: commercial, mixed-use, residential and other types of projects.
- Provide engineering support during design, permitting, development, and construction for various land development projects;
- Working with municipalities towards approval and permits;
- Monitoring of construction activities to ensure construction quality and adherence to permits;
- Applying judgment on design decisions and selection from standard engineering techniques and alternatives;
- Prepare hydrology and earthwork evaluations;
- Prepare engineering reports and submittals; and
- Contributes significantly to the preparation of specifications and project documents.

Qualified applicants should possess all or some of the following:

- Bachelor of Science in Civil Engineering or related field;
- 5-10 years of experience providing engineering planning, design and oversight on land development projects;
- Experience with stormwater management, grading & drainage design, sanitary & roadway profiles, site planning & conceptual site layouts, zoning ordinance review and research, lighting design, cuts/fills, earthwork quantities, erosion and sedimentation control design and permitting;

- Computer skills in AutoCAD, Land Development Desktop, Civil 3D, Excel, hydrology and earthwork software;
- Experience applying professional knowledge and prescribed procedures to progressively difficult problems;
- Ability to work in a dynamic, team-based atmosphere; • Strong organizational and communication skills;
- A professional demeanor, and a can-do attitude.
- PE license is a plus.
